

dear fcc

the influence of "BIG MONEY" radio must be paying you well these days! how in the world can the fcc think about taking local weather and traffic away from paying satellite radio customers. is it offensive in the likes of "bubba the love sponge" or Howard Stern? to regulate pay radio is stepping over your bounds and I hope youll take this letter in consideration. People like myself enjoy satellite radio because it offers more than the average lame shove it down your throat cookie cutter garbage that the BIG stations offer.

Thank you and don't let it

come to this
